

SUNI

ROADMAP - 2021

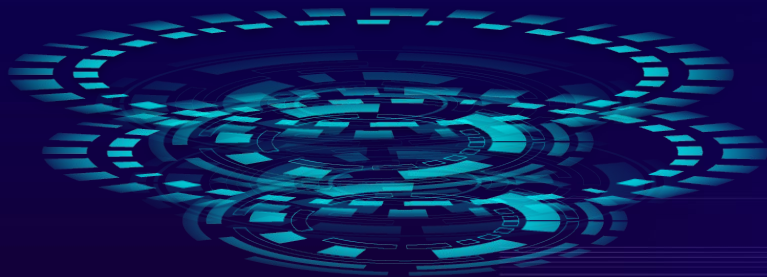

ACTIONS FOR THE PLANET

PRESENTATION

Our commitment is to help you make informed investment decisions regarding SUNI by providing relevant information in a timely and accurate manner

04/01/2020

SUNI was created to address the universal issue of environmental pollution and climate change

Our first step was helping local organizations by offering support where it was most needed. We were able to assist with projects, community building, and more

APRIL

12/15/2020

We began moving forward with technological development, artificial intelligence designs, and blockchain expansion

We created our own blockchain to automate the flow of information within environmental organizations

Our A.I. validates photos and videos of sustainable campaigns for accuracy

DECEMBER

2021

TECHNOLOGY

Our mission is to create Blockchain technology which can be used to support international organizations which focus on democratizing environmental advocacy

ENVIRONMENT

Our world is in desperate need of a community of individuals who can approach climate health with dedication and unique solutions

03/17/2021

We started creating the SUNI
TOKEN ERC-20 coin on the
Ethereum blockchain network

SUNI was released with
1,000,000,000 tokens

An initial portion of 10 million
SUNIs are liquid and available in
uniswap

MARCH

04/30/2021

Announcing our Professional Team

Creating multimedia files for communication in digital media

Announcing NFT Digital Arts Collection

Implementing Governance system through MetaMask

APRIL

05/20/2021

Invite local and international organizations to begin developing proposals to be presented within the community

Develop and deliver the first sustainable airdrop proposal through the use of the Governance system

MAY

06/28/2021

Registration and audit of the SUNI Foundation through official, third-party sources

Deliver the first completed proposal and begin to enact meaningful change in the world around us

Organize both a technological and an administrative work team

JUNE

07/28/2021

Develop the architecture of our dapps system

Assess the results of the first published proposal

Create our second NFT collection

Launch official marketing team

JULY

08/28/2021

Assist local organizations in coordinating and executing the first initiative approved through the Governance community

Raise project awareness by partnering with international influencers

AUGUST

09/28/2021

Present the frontend dapps mockup and functionalities

Develop the backend platform of the dapps system

Measure the impact of the first completed sustainable campaign

SEPTEMBER

11/30/2021

Release DAPPS v1 available exclusively for users holding SUNI

Present the second sustainable rewards proposal

Assist local organizations in coordinating and executing the second initiative approved through the Governance community

NOVEMBER

12/30/2021

Release the official version of the DAPPS for widespread, public use

Assess the success of the 2021 projects and apply necessary adjustments

Audit the general costs in 2021 and publicly disclose to the community

Publish the completed project results adding stats and analytics

DECEMBER
